

KEY90

the unique puzzle with only one solution

Free Sample

Each Key90 puzzle contains a grid of letters and numbers. Some of the letters are repeated, some are displayed once. Each letter has a value.

Adding the value of the letters together gives the total shown at the side and base of the grid. These totals, in turn, add up to the amount shown in the bottom right corner: this is always a number between 73 and 87.

The object of the puzzle is to work out the value of each letter. This value is always a number between 1 and 9. To add piquancy to the puzzle the identity of one of the letters is hidden by the letter x.

You are given two clue letters to get started. Solve x, find the value of the other letters, and you've completed a KEY90 puzzle.
